

Sea Spray is the first seeded hybrid seashore paspalum. Sea Spray is an extremely salt tolerant turfgrass, exhibiting outstanding turf quality, a bright green color, and beautiful, uniform appearance. Ideal for temperate to hot, humid coastal climates, Sea Spray also affords excellent drought tolerance, and good shade tolerance. It is excellent for use on areas irrigated with effluent water, or subject to naturally high saline conditions. Available as seed or sod.

For Golf Greens, Tees & Fairways. And Home Lawns & Landscape.

Features and Benefits

Color

- Bright green.

Texture

- Medium-fine.

Performance

- Sod can be repaired or strengthened with seed.
- Very high salt tolerance. Greater than bermudagrass.
- Aggressive, prostrate, spreading growth habit.
- Good wear tolerance with moderate recovery.
- Moderately dense.
- Aggressive stolon and rhizome growth.
- Prefers soils with moderate to high salinity. Tolerant of most soil types, pH range of 4.5-9.0.
- Excellent drought tolerance.
- Better cold tolerance than most bermudas. With high nitrogen and lower mowing heights it exhibits good winter color in mild winter climates.
- Good performance in wet, boggy conditions.
- Very good disease resistance in saline conditions.
- High hypoxia tolerance. Can thrive in low, boggy, high water table environments, and can withstand periodic short-term inundation with water (sea water) for long periods of time.

Climate

- Thrives in warm to hot climates, USDA zones 7 to 11.

Shade Tolerance

- Full sun to moderate shade tolerance.
- Performs well under reduced light quality conditions such as rainy, cloudy, foggy, or smoggy environmental climates, but not in severe tree shade conditions.

Establishment and Maintenance

- Requires good quality water for establishment (30 days).
- Low maintenance.
- For best performance, fertilize at annual rate of 2-3 lbs. N/1000 sq. ft. Early fall and spring fertilization best. Summer fertility with high nitrogen is not recommended. Sea Spray likes potassium and chlorine.
- Deep, infrequent irrigations are best throughout the growing season.

Mowing

- 1/4" – 1 1/2"

USES FOR SEA SPRAY

- Turf irrigated with effluent water or subject to naturally high saline conditions.
- Golf tees, fairways, and roughs.
- Parks, home lawns, and recreational turf.
- Low maintenance turf.
- Erosion control.
- Coastal sites influenced by salt.

How To Specify Sea Spray

When ordering, please specify sod or seed. Sod options are regular, thick-cut, or big roll. Ask about our special service for special turfgrass blends. Expert installation and world-wide shipping available.

West Coast Turf— A Full-Service Company

We ship anywhere in the world! Our trucks are standing by to deliver your turf fresh and ready to plant. We can also prepare your turfgrass for shipping by air to any overseas destination.

We can install your new sod!

For any type of project, no matter the scope or location, our skilled crews will use their specialized high-tech equipment to install your new turf quickly and dependably. You can count on our experts to get the job done right the first time.

We can grow your special blend!

Need a specific blend or mix of turfgrass? Our expert farm crews can grow sod to meet your specific requirements – and on time.

To Order or For More Information

Sea Spray and other fine turfgrasses are available directly through West Coast Turf with five Western locations to serve you: Palm Desert, CA; Stevenson, CA; San Marcos, CA; Winchester, CA; and Tempe, AZ. Other West Coast Turf varieties include bentgrass, bermudagrass, bluegrass, ryegrass, St. Augustine, zoysiagrass and fescue. Installation and maintenance guides are also available. To order or for more information, please contact:

West Coast Turf

P.O. Box 4563
Palm Desert, CA 92261
Phone: 760/340-7300, 800/447-1840
Fax: 760/340-7345

Turfgrass Warranty

The grass is guaranteed to be in vigorous condition, weed- and disease-free upon delivery to the site. No other warranty is offered or implied.

Options

Regular sod comes in 16" x 72" rolls with ½" of soil. Each weighs approximately 45 lbs. Great for normal conditions.

Big-roll sod is 42" x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, parks, and golf courses.

Thick-cut sod has up to 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be put back in play within a few days.

Washed Sod has had the soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.

Seed for repairs.
