

Tifgreen's wide range of mowing heights and low, dense growth habit make it one of the most versatile hybrid bermudas. A great look in almost any setting, Tifgreen 328 combines very fine texture with a beautiful green color. Tifgreen 328 overseeds well and has fewer pest and disease problems than cool-season grasses. For use on golf course tees and fairways, lawn tennis courts, lawn bowling greens, sports fields, and commercial and residential lawns.

For sports fields, golf courses and lawns.

Features and Benefits

Color

- Beautiful dark green.

Texture

- Fine.

Performance

- Highly ranked in overall-quality studies of bermudagrass cultivars conducted by the National Turfgrass Evaluation Program (NTEP).
- Recovers quickly from injury with vigorous, dense growth habit.
- Tolerates close mowing and a wide range of mowing heights.
- More resistant to disease, pests and weeds than bentgrass.
- Shorter internodes make it suitable for greens, tees and fairways.
- Excellent overseeding ability.
- Produces few seed heads which means less mowing.

Climate

- Thrives in warm to hot climates, USDA zones 7 to 11.

Shade Tolerance

- Not shade tolerant, requires full sun all day.

Maintenance

- Moderate level of maintenance required.
- Fall overseeding may be required in cold winter climates.

Mowing

- 1/4" to 1-1/2".

Turfgrass Warranty

The grass is guaranteed to be in vigorous condition, weed- and disease-free upon delivery to the site. No other warranty is offered or implied.

Options

Regular sod comes in 16" x 72" rolls with 1/2" of soil. Each weighs approximately 45 pounds. Great for normal conditions.

Big-roll sod is 42" x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, parks and cemeteries.

Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be back in play within a few days.

Washed sod has had soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.

Overseeded sod is perfect for fall-season installation. No need to overseed!

Stolons are broadcast like seed on a prepared bed. Installation is easy and inexpensive.
