

Platinum TE Paspalum

Platinum TE is used for sports fields, wall to wall on golf courses and for home and landscape.

West Coast Turf's Platinum TE is used around the world most prominently on projects facing challenges due to poor quality and/or poor soils but also thrives with clean irrigation water. Platinum TE has vast mowing versatility. This plant adapts creating shorter more compact nodes and a finer leaf texture to become an exceptional greens quality surface when mown at close mowing heights it also thrives well when left un-mown in areas such as bioswales to achieve successful water filtration. Platinum TE is our most water saving drought tolerant turfgrass we offer.

FEATURES AND BENEFITS

Color

- > Bright green

Texture

- > Fine

Performance

- > Very high salt tolerance
- > Aggressive, spreading growth habit
- > Good wear tolerance with moderate recovery
- > Tolerant of most soil types, pH range 4.5-9.0
- > Excellent drought tolerance
- > Platinum will handle hard frosts better than bermudagrass. With high nitrogen and lower mowing heights it exhibits good winter color in mild winter climates

- > Shorter dormancy period than EZ-Turf, BOBSod, Bull's-Eye, Tifway 419, and 328. It can transition up to a month quicker than some bermudas
- > Very good disease resistance in saline conditions
- > Can thrive in low, boggy, high water table environments, and can withstand periodic short-term inundation with potable water or sea water
- > Leaf blade has a waxy-wet look on one side and has an upright growth habit
- > Drought tolerance exceptional

Climate

- > Thrives in warm to hot climates USDA zones 7-11

(cont.)

PLATINUM TE AT A GLANCE

- > Ideal for turf irrigated with effluent water subject to naturally high saline conditions
- > Golf tees, greens, fairways and roughs
- > Parks, home lawns, and recreational sports turf
- > Low maintenance turf
- > Erosion control
- > Coastal sites influenced by salt
- > Water saving

**WEST COAST
TURF**

Life is short. Sod it!

westcoastturf.com

Shade Tolerance

- > Full sun to moderate shade tolerance.
- > Performs well under reduced light quality conditions such as rainy, cloudy, foggy, or smoggy environmental climates, but not in severe tree shade conditions

Establishment and Maintenance

- > Requires good quality water for establishment (30 days).
- > Low maintenance
- > For best performance, fertilize at annual rate of 2-3 lbs. N/sq. ft. Early fall and spring

fertilization best. Summer fertility with high nitrogen is not recommended. Platinum likes potassium and calcium

- > Deep, infrequent irrigations are best throughout the growing season

Mowing

- > 1/2" to 2" but is most successful around 1 1/4". Platinum TE can be left un-mown (roughly 6") in bioswale applications or slopes

How To Specify Platinum TE **When ordering, please specify sod or stolons. Sod options are regular, big-roll, thick-cut, washed and overseeded. Ask about our custom growing service for special turfgrass blends. Other options available from West Coast Turf are expert installation and shipping anywhere in the world.**

Options

- > **Regular sod comes in 16" x 72" rolls or 24" x 60" with 1/2" of soil. Each weighs approximately 45 pounds. Great for normal conditions.**
- > **Big-roll sod is 42" x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, parks and cemeteries.**
- > **Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be back in play within a few days.**
- > **Washed sod has had soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.**
- > **Stolons are broadcast like seed and prepared bed installation is easy and inexpensive.**

Turfgrass Warranty

The grass is guaranteed to be in vigorous condition, weed and disease-free upon delivery to the site. No other warranty is offered or implied.
