

# West Coast Bentgrass

For  
golf course  
greens  
and  
lawn tennis  
courts

Carlton Oaks Golf Course  
San Diego, CA

West Coast Turf's family of bentgrasses remains unsurpassed for ball roll and fast speeds on golf courses. Newer varieties combine classic dark-green color and fine texture, with improved cold and heat tolerance, heavy traffic resistance, and close mowing. From the high performance "A" series and Tyee/007 blend, to the ever popular Pennncross, these bentgrasses set new standards in playability and adaptability. Also for use on lawn tennis courts, croquet pitches, and lawn bowling greens. Available grown on USGA sand.

## FEATURES AND BENEFITS

### Color

- > Beautiful bright green to very dark green

### Texture

- > Fine to very fine

### Performance

- > **A-4** has upright growth and prefers low mowing heights down to 1/8". It recovers quickly from injury and has improved heat and wear tolerance.
- > **Pennlinks** was developed for grainless greens. Pennlinks has upright, dense growth for true putting. It has fine texture and heat tolerance.

- > **Dominant Plus** is a blend of creeping bentgrasses that have improved tolerance of cold and heat. They also have improved resistance to disease. Its growth is compact and upright, and has high shoot density for true ball roll.

- > **Tyee/007** blend has upright growth and dense tillering that resists spiking, and repels annual bluegrass. It provides a fast and virtually grainless putting surface and has improved heat tolerance and disease resistance.

- > **Pennncross** has been the most popular bentgrass in the world and is still preferred by many superintendents. Aggressiveness, vigor, and wear tolerance make it a natural for greens. It's ability to perform under a wide

(cont. >)

## How To Specify West Coast Bentgrass

**Available as sod only. Options are regular, native sand, spec sand, big roll, and washed. Ask about our custom growing service for special turfgrass blends. Other options available from West Coast Turf are expert installation, and worldwide shipping.**

### Options

- > **Standard sod comes in 16" x 72" rolls of soil. Each weighs approximately 45 pounds. Great for normal conditions.**
- > **Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for immediate play.**
- > **Big-roll sod is 42" x 30" or 48" x 40", allowing large areas to be sodded quickly and efficiently. Great for golf course greens and tennis, croquet, and bowling lawns.**
- > **Washed sod has the soil removed from the roots to help eliminate sod-to-soil incompatibilities, and to help the sod knit to the soil faster. Reduces shipping weight.**
- > **Sand grown meets the stringent requirements established by the USGA.**

The Olympic Club  
San Francisco, CA

range of conditions makes this bentgrass adaptable virtually worldwide. Golf course architects have specified Pennncross for areas of extreme cold and heat, and can tolerate humidity where bermudagrass used to be the standard.

#### **Climate**

- > Thrives in cool to warm climates, USDA zones 3 to 7.

#### **Shade Tolerance**

- > Moderately shade tolerant, requires full sun most of the day.

#### **Maintenance**

- > High level of maintenance necessary.
- > No overseeding is required.

#### **Mowing**

- > 1/8"-1/4"
