

Tolerant of shade, heat, drought, saline soils and close mowing, West Coast Turf's De Anza Zoysia offers the best durability of all turfgrasses. Tough yet beautiful, De Anza Zoysia has the blue-green color of bluegrass and fine, soft texture. It offers the fastest spread and greatest wear tolerance of West Coast Turf's zoysia-grasses. De Anza requires less maintenance and stays green longer into the fall than other types of warm-season

For sports fields and golf courses.

Features and Benefits

Color

- Beautiful blue-green.

Texture

- Fine and soft.

Performance

- Stiff, upright leaf blades provide superior wear tolerance.
- Provides a low-growing, dense stand of turf without the thatch associated with other warm-season turfgrasses.
- Dense growth habit provides a weed-free, carpet-like cushion.
- Spreads rapidly for quick establishment and recovery from injury.
- Tolerant of heat, drought, shade, saline water and saline soils.
- Requires up to one-third less water, fertilizer and herbicides than other warm-season grasses.
- Requires up to one-third less mowing and edging than other warm-season grasses.
- Retains blue-green color longer into the fall than Emerald, Belair or Meyer.
- Tolerates close mowing.

Climate

- Thrives in warm to hot climates, USDA zones 7 to 11.

Shade Tolerance

- Moderately shade tolerant, requires full sun most of the day.

Maintenance

- Low level of maintenance required.

Mowing

- 1/2" to 3".

Turfgrass Warranty

The grass is guaranteed to be in vigorous condition, weed- and disease-free upon delivery to the site. No other warranty is offered or implied.

Options

Regular sod comes in 16" x 72" rolls with 1/2" of soil. Each weighs approximately 45 pounds. Great for normal conditions.

Big-roll sod is 42" x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, parks and cemeteries.

Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be back in play within a few days.

Washed sod has had soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.
