

Santa Ana Bermuda

Santa Ana bermuda was born and bred in California. It is one of the most drought tolerant hybrid bermuda grasses, with a short dormancy period.

While normally used in Southern California, Santa Ana pushes the northern boundary of the transition zone, and has proven successful. Its ability to tolerate cooler temperatures, excellent fall color retention, and early spring green up help make it thrive in this climate. Its medium-fine deep color, and wide range of mowing heights make it an ideal choice for golf courses, athletic fields, commercial, and residential lawns.

FEATURES AND BENEFITS

Color

- > Dark green

Texture

- > Medium-fine

Performance

- > Short winter dormancy
- > Wide range of mowing heights
- > Recovers quickly from injury due to high shoot density and vigorous growth habit
- > Displays an above average tolerance to acidic, alkaline, saline, and poorly drained soils
- > Tolerant of heat, heavy foot traffic, and drought

Climate

- > Thrives from coastal to warm and hot climates
USDA zones 7-11

Shade Tolerance

- > Not shade tolerant, full sun preferred, slightly more shade tolerant than Tifway varieties

Maintenance

- > Moderate level of maintenance. Fall overseeding may be required for winter color

Mowing

- > 1/4" to 1 1/4".
- > Power reel or rotary mower

West Coast Turf—A Full-Service Company

We ship anywhere in the world! Our fleet of refrigerated trucks are standing by to deliver your turf fresh and ready to plant. We can also prepare your turfgrass for shipping by air to any overseas destination. Your turf will arrive healthy and on time. We are also offering Field Removal and TopMaker field recycling services for leveling, cleaning, dethatching, and renovating turf areas, bringing the surface to perfect condition!

How To Specify Santa Ana Bermuda When ordering, please specify sod or stolons. Sod options are regular, big-roll, thick-cut, washed, and overseeded. Ask about our custom growing service for special turfgrass blends. Other options available from West Coast Turf are expert installation and shipping anywhere in the world.

Options

- > **Regular sod comes in 16" x 72" rolls or 24" x 60" with 1/2" of soil. Each weighs approximately 45 pounds. Great for normal conditions.**
- > **Big-roll sod is 42" x 105', allowing large areas to be sodded quickly and efficiently. Great for large sports fields, golf courses, parks and cemeteries.**
- > **Thick-cut sod has up to a 2" soil base that provides anchorage for the sod until its roots knit to the subsoil. Ideal for renovating a sports field that needs to be back in play within a few days.**
- > **Washed sod has had soil removed from the roots to help eliminate sod-to-soil incompatibilities and to help the sod knit to the soil faster. Reduces shipping weight.**
- > **Overseeded sod is perfect for fall-season installation.**
- > **Stolons are broadcast like seed on a prepared bed. Installation is easy and inexpensive.**

We can install your new sod!

For any type of project, no matter the scope or location, our skilled crews will use their specialized high-tech equipment to install your new turf quickly and dependably. You can count on our experts to get the job done right the first time.

We can grow your special blend!

Need a specific blend or mix of turfgrass? Our expert farm crews can grow sod to meet your specific requirements—and on time.
