

West Coast Turf's Hillside Fine Fescue is the ultimate low maintenance, cool season turfgrass. This fine fescue is a three-way mix of Florentine GT Strong Creeping Red Fescue, Seabreeze GT Slender Creeping Red Fescue, and Tiffany Chewings Fescue.

Florentine has strong rhizomes to provide a spreading compact growth habit that will quickly fill in weak or damaged areas. It also has improved salt tolerance as compared to other strong creeping fescues on the market.

Seabreeze has a bright green color with great density, aggressive growth, and good color during winter months. It also has excellent salt tolerance compared to most fine fescues.

Tiffany is the most competitive of the three species. With a bright medium-green color, it tillers rapidly providing strong springtime turf quality.

When mixed together, these three fine-leaf fescues provide a dense, low growing, fine textured turf with low fertility requirements. In cooler, more temperate climates, fine fescues perform well in full sun to moderately heavy shade. In warmer, transition climates they perform best when shaded from the heat of the afternoon sun.

Hillside Fine Fescue can endure a broad range of mowing heights. If left un-mowed, it takes on a beautiful natural look.

Ideal for partial shade, under trees, and un-maintained areas. For use on golf course roughs and bunkers, and all types of landscapes.

For golf courses, lawns and unmaintained areas.

### Hillside Fescue at a Glance:

- **Good shade tolerance**
- **Low maintenance**
- **Slow growing**
- **Fine texture**
- **Deep-green color**
- **Wide range of mowing heights**
- **Not recommended for traffic areas**

### Features and Benefits

#### Color

- Beautiful deep green.

#### Texture

- The finest texture of all cool-season grasses.

#### Performance

- Slower growing and less invasive than other cool-season grasses.
- Slow growth means less fertilizer and mowing is required.
- Provides a native or natural look with infrequent or no mowing.
- Can be used in un-maintained areas as a very low- or no-maintenance grass.
- Can survive on less water and is less prone to dormancy during drought.
- Fares well under trees and won't compete for water and nutrients.

#### Climate

- Thrives in cool to warm climates, USDA zones 3 to 8.

#### Shade Tolerance

- Good shade tolerant.

#### Maintenance

- Low level of maintenance required.

#### Mowing

- 2" to unmowed.
